ment journal, says arrangements are nearly completed for the full resumption of diplomatic relations with the United States, and that the minister selected will probably arrive at Washington before the 1st of March. No name is given, but the Observer says, that, when known, it will be well received on both sides of the Atlantic.

There are rumors in France of another loan.

Eighteen hundred Swiss residents of Paris have demanded passport reform.

Several French ships of war are fitting out for China.

Late and Important from Nicaragua.

New Orleans, Jan. 15.

The steamer Texas arrived here today from San Juan.

The Purser reports that the Costa Ricans, protected by the English fleet, had seized the steamer on San Juan river.

The steamer San Carlos left Virginia Bay with Nicaragua passengers on the 31 of January, but was captured by the Costa Ricans, and getting into the river.

Col. Beckwith, with 250 men, had possession of Punta Arenas, but the Costa Ricans, exceeding 1000 men, held every other point on the river.

The report that Gen. Henningsen had been killed at Granada is confirmed. He has joined Gen. Walker at Rivas.

Gen. Walker's army is represented as being in good spirits, while the allies are fighting among themselves.

Gen. Henningsen received reinforcements on the 13th of December, and on the 14th, after a siege of 10 days, he succeeded in driving the enemy back to him, with a loss of 1,400.

Gen. Henningsen's loss was 200. The odds against him were 10 to 1.

All the military stores, artillery, public documents, &c., were removed to Rivas, unharmed.

Walker took possession of Rivas without opposition, the enemy evacuating on hearing of his approach.

The Costa Ricans have taken possession of all the boats on the San Juan river, cutting off communication with Walker.

A special dispatch to the Associated Press states that the Costa Ricans were present in that city by the British.

Three hundred persons were waiting at Punta Arenas for the departure of the steamer, which would take five days, when they were determined to proceed up the river.

Just as the Texas was leaving, a messenger arrived at the station.

Walker, hearing that something was wrong, had come over, and finding the state of affairs had changed, Fort San Carlos, which had been taken by the enemy, and was rapidly coming down the river, scattering all before him.

What We Import.—The articles of chief value imported into the United States during the fiscal year, ending June 30th, 1895, were coffee, tea, sugar, and the manufactures of woolen, cotton, silk, linen, iron, steel, copper, &c., &c. These were in round numbers nearly as follows:

Coffee	\$21,500,000
Tea	6,900,000
Woolen Manufactures	30,000,000
Cotton	26,000,000
Silk	33,000,000
Linen	11,000,000
Iron and Steel	64,000,000
Copper	2,000,000
Lin	6,000,000
Lead	2,000,000
Molasses	4,300,000
Sugar	22,600,000

The total value of the products of agriculture exclusive of cotton and tobacco, were about forty-five per cent. of the total value imported during the year. The value of the Cotton is \$120,000,000 of Tobacco \$12,000,000, and Manufactures \$10,000,000. For convenience we have stated the amounts in round numbers.

PRICE OF WOOL IN NEW YORK.—The high price which wool now commands, deters consumers from purchasing beyond their absolute wants.

The transactions in fleece wool for the week, reach only about \$50,000 lbs. in lots, at from 45 to 50c. as to quality.

Choice fleeces sell in a small way, at 60c to 62c, 6 mos. Pulled wool is in smaller supply, and prices are very firm. Sales, 25,000 lbs at 34c to 36c, for super, and 45c to 46c, for extra country. In foreign there is but little doing. From the fact of there being no stock of moderate here. Prices, therefore, rule very firm.

American Saxony is worth from 55 to 60; Half-Blood Merino, 50 to 54; Native half blood, 34 to 37. We hear of no sales in Cleveland.—Ohio Farmer.

THE NEW YORK HERALD has very important intelligence from Japan. A grand conspiracy of the dignitaries of the empire has decided to permit no foreigner to visit the interior; therefore the efforts of the English, Russians and Americans to open trade with that country have proved of no avail. The Japanese simply supply our vessels with necessities, and receive in payment only gold and silver. The Dutch, on the contrary, are in high favor, and enjoy a monopoly of foreign traffic. The Japanese are making rapid progress in naval knowledge, and they have appropriated two million and a half of dollars for getting up a fleet of vessels of war, on the European plan, to be commanded by Dutch naval officers. Fear of the vessels is to be a screw thread.

NEBRASKA.—The Land Office at Omaha was to be opened in the early part of December. A few months hence all the surveyed lands in that Territory will be offered at public sale. The Pawnee Indians are causing some trouble in the Territory by fixing their residence on land about twenty-five miles from Omaha, which they have no right to occupy. The Government had previously bought the land of the Omahas, who owned it; but the Pawnees held it on a prior lease from that tribe, subject to the payment of tribute, they now demand that they shall be bought off.

Coal is now selling in Louisville at fifty cents a bushel.

Resource of Upper Kentucky.

We are of opinion that the block of counties of the Kentucky river from Estill to Owen, have an object in their reach that should call forth their best efforts; we mean the coal, iron, salt and lumber. In the neighborhood of the Three Forks of the Kentucky River, that those counties can adopt some plan by which they can obtain an abundant and regular supply of these most useful, as well as the most profitable articles of trade, we believe, and that by uniting their means they cannot only greatly benefit themselves but give an impetus to trade that will redound greatly to the benefit of the State—whether they should make a railroad running with the river, or look and claim the river, might be of importance to determine but that they are duty bound to do one or the other, we believe all will admit. What say you, gentlemen, of the Lexington Statesman, Mountain Democrat, Richmond Messenger, and Paris Flag. As for the Legislature, we feel that those counties are able to help themselves and ought to do it.

The subject to which our attention is called in the above article from the Frankfort Journal, was fully discussed by a correspondent in our paper a year ago. It was then maintained that completing the locks in the Kentucky River was the only practical mode of accomplishing the object and that could become if the counties interested would take it up. The Legislature some years ago chartered a company to complete this improvement, but gave no authority to the counties interested to take stock and nothing has been done. It is the opinion of practical engineers that the work can be completed to the Forks for less than \$200,000.—It is the Legislature will amend this charter and give the counties permission to take stock and annually subscribe the next points of the locks already built in the stock of the Company, the work will be speedily done and counties like Estill, Owsley, Breathitt, Madison, Garrard, Mercer, and Anderson on this side of the river, to say nothing of the counties on the opposite side, will have an outlet and market, vastly superior to any Rail Road communications that will be built in the present century.—Having said thus much in answer to the inquiry of the Journal, we are inclined to enlarge the scope of inquiry, and ask what the Winchester Chronicle, Lexington Observer & Reporter, Frankfort Commonwealth, Lancaster Sentinel, Danville Tribune, Harrodsburg Transcript, also, have to say upon the subject.

Richmond Messenger.

"Independent," the Washington correspondent of the Philadelphia North American, in his letter of the 6th inst., says:—"Mr. Buchanan's own respectable shadow had suddenly appeared in Washington, it could not have been hailed with more deference by the faithful, than has the bodily presence of Mr. John Appleton, who came with the report of being nothing more than the *Falco A. A. A.* of the President's election. It is marvelous how keen the sense of men are in sending out the ray of truth to power. Here is a model and unpretending gentleman, counted on all hands, as if he were the King's conscience keeper, and lavished with hospitality, as if he had been dangled upon the knee of the prince of epicures. It is worth many a good dinner to be either near the throne or behind it, in this glorious season of canvass-backs; and how fortunate look upon Master Appleton with feelings of too high envy, as they hear of the many invitations his overland engagements compel him to decline. This being the state of things now, what will it be when Mr. Buchanan turns up in proper person? Let him be admonished to live low for a few weeks to come, and to fortify himself against a hospitable siege which is planned by a host of distinguished admirers. There are several mission-seekers who have been impressed. Mr. Appleton very likely, and may be that even one or more of the Cabinet aspirants have succeeded nearly as well."

REWARDS OF MECHANICAL GENIUS.—It is noted in the Scientific American, that the right to a portion of Ward's Patent Shingle Machine was recently sold in Albany for \$35,000. A portion of Robertson's Sewing Machine has also been sold for \$30,000. This is an invention which can be carried in the pocket, and will enable a seamstress to do in one day the ordinary labour of a week. Machines of this kind are about to be constructed in New Haven, Connecticut, by the Messrs. Jerome, at \$10 apiece; the manufacturers are now constructing the machinery, and expect to sell orders in January. How's Patent Sewing Machine yields, it is said, \$50,000 for licenses to use it, and Singer's machine puts \$75,000 in the pockets of the owners. Rights to the use of a corn-planter have been sold to the amount of \$30,000. Clark's Patent Pump sold for \$30,000. A portion to a right to an Apple Paring Machine, \$2,000.—Cresmer's Patent Car Brake, \$200,000. Such rewards as these for American inventions are certainly stimulating to mechanical genius.

AN INDIAN REPUBLIC OR TWO.—Twenty-five Dakota families, living at Hazelwood, some forty miles above Fort Ridgely, on the St. Peter's river, Minnesota, have renounced their tribal character, donned civilized dress, and formed themselves into a sort of Republic, with a written Constitution, President, &c. They are intelligent and industrious, and have what is called to sell.

At the Red Wood Agency there is a similar organization, with some ten or twelve families uniting in it.

IMPORTANT TO FARMERS.—The following receipt is said to have cured since last shearing upwards of 100,000 sheep of the itch in one district in Australia, and is now universally adopted there with certain success:—"Within twenty days thoroughly dip the sheep twice in a decoction of tobacco, one pound to four gallons of water heated to 100 deg. Fahr. to which add one pound of sulphur." This can be used at any season of the year, and with perfect safety, as it does not injure the sheep. Arsenic and corrosive sublimate are entirely discarded in Australia.

How Minnesotians Live.

An impression obtains abroad that Minnesotians have to endure a great many hardships and privations. Let us see if this is so.

Wages here are up, and that is certainly not much of a privation. Day-laborers receive \$1.00 per day. Mechanics from \$2 to \$2.50 and \$3 per day, and the pay is generally punctual.

Congress land may be had at \$1.35 per acre by going a few miles farther in a northerly direction, or a few miles from the river; and no better agricultural lands are to be found, "neither the soil, nor the things taken into consideration."

The climate, too, is unsurpassed. After a residence here of nearly two years, we unhesitatingly assert that it is not excelled by any in the world, except, perhaps, that of the Sandwich Islands. It is pure, healthy and invigorating. It has been circulated in the States that this climate is not subject to sudden changes; but this is a mistake. We have seen our great and sudden changes here as we have seen in the latitudes of Missouri, Indiana, or Ohio. Nevertheless, the people here are affected but little, if any, by these changes—owing, we suppose, to the quality of the atmosphere. But we will not stop to philosophize. We merely state the facts, and leave theorizing to others.

Food is of the best kind and abundant. Vegetables, fat and luscious, may now be had here, in any quantity, for from seven cents to eight cents for fore-quarters, and nine and ten cents for hams. All the meat stores are well supplied. On Wednesday morning last, twenty-two whole deer passed through this place on a rail. Some were dressed, or rather undressed, and some were not. They were killed thirty miles north of this city, in Wisconsin, by Half-Breed Indians, and they were taken to St. Paul, because the market here was overstocked. Occasionally we have heard that women make an epicurean's mouth water. Then too, we have prairie chickens, and pheasants, and white rabbits without number.—Also, a plenty of beef, and pork, selling at ten cents by the quarter, and fifteen cents for small and choice pieces. Then we have the best Irish potatoes that ever grew. Next we have an abundance of cranberries; a berry which, when properly prepared, is the purest and best, and pleasantest, and decidedly the healthiest that mortal man ever subjected to the processes of mastication and deglutition. Then we have wheat and wheat flour Indian meal—each and all Minnesota products. Next we have any quantity of fresh fish, such as pike, pickerel, bass, perch, the sun fish, the cat fish, and occasionally a fine speckled trout right out of some of our numerous, bold, leaping, sparkling, bubbling streams. Next we have turkeys, geese, chickens, ducks, partridges, quails, and English turkeys, and those who attended to it in the proper season, have preserved game and venison. Also, some Minnesotians have a large supply of good apples stored away in their cellars, but the apples from the States, and apples will continue to come from these until they be raised here in great abundance.

With such a variety as the above to select from, we should like to know how any one can suffer very materially for the want of nutritious and palatable eatables. It strikes us that the danger is that Minnesotians are in a fair way to do as certain persons in ancient times did—i. e. they eat and drink, instead of starving.—St. Louis Union.

Stock Sales on Corn Day.—We conclude the reports of sales of stock on corn day. As before mentioned, stock sold rapidly and at fair prices, being an improvement upon the last year's sales. The following are the sales:—Cattle, 100 head, at \$10.00; 50 head at \$11.00; 50 head at \$12.00; 50 head at \$13.00; 50 head at \$14.00; 50 head at \$15.00; 50 head at \$16.00; 50 head at \$17.00; 50 head at \$18.00; ## The Farmer's Column.

**THE FARMER'S COLUMN.**  
A THING WHICH A FARMER SHOULD KNOW.—If you wish to drive a cut-and into season oak timber, and not to have it break or bend, just have a small quantity of oil near by and dip the nail before driving, and it will never fail to go. In mending cartwheels plow this in of great advantage, for the are generally made of oak wood. In straightening old nails before using, let it be done on wood, and with easy blows. If done on iron they will be sure to break.

**BENEFIT OF DEEP PLOWING.**—The Michigan Farmer states that H. R. Lathrop, of Jackson County, that State, put in a piece of wheat, plowing not less than eight inches deep. At the same time, a neighbor plowed an adjoining field, being careful that he did not run more than four inches deep. The deep plowing gave thirty-two bushels to the acre, and the shallow plowing only seven. A portion of the sub-soil often operates as manure, and deep soil prevents excessive flooding as well as excessive drought. The result, however, may vary much with change in localities, but it can be easily determined by experiment.

**FOOD FOR MILK COWS.**—At a large milking establishment in the North of England, the cows are fed in the following manner, viz: Ninety-one pounds of clover hay, cut or chopped; and one pound of salt; one hundred and sixty-eight pounds of brewer's grain; twelve pounds of ground flax-seed. These ingredients are mixed together, and equally divided as the food of twelve cows. The hay, after being cut, is put into the wash tub and soaked with boiling water. The other articles are then mixed with it. The results of this diet, it is said, was of milk the average yield of fourteen quarts, for a period of eight months in succession. A farmer who has experimented for the last five years in this matter, after trying nearly all kinds of food, says that his cows give more milk and make more butter, from corn meal; wet, with cut straw, than from any other food, by from one third to one half. It will not do to feed hay or straw at the same time—it fattens the cows too much. Try four quarts of meal and one bushel of straw, per day—that is, two quarts morning and night—the straw at noon; they will gain in flesh at that. Stabling is indispensable while feeding on this plan.

## Miscellaneous.

## SINGER'S SEWING MACHINES!

GREAT success is always the most conclusive proof of merit. Judged by this test there is no labor saving Machine before the public comparable to SINGER'S SEWING MACHINES. After establishing the highest reputation in the United States, they were exhibited at the Exposition Universelle, in France, where they carried off the highest premium; and a great manufacture to make them has been built in Paris. In every branch of Industry in which sewing is to be done, these Machines can be used with immense profit. As the speed of the Machinery is so great, and the work so perfect, it is no wonder that they are so generally used. In straightening old nails before using, let it be done on wood, and with easy blows. If done on iron they will be sure to break.

**One Thousand Dollars a year.** In all private families where there is much sewing to be done, these machines are an invaluable assistance. Plasterers and hotel keepers find them particularly convenient and profitable. These machines are simple in their construction, and very strong and durable, being the only kind of Sewing Machine ever made, by which every part of each, coarse or fine, could be perfectly repaired. Thousands of instances of the wonderful labor saving Machines have been made and sold under various names, but SINGER'S MACHINES alone have been found everywhere to satisfy the wants of the public. Their printed instructions for using are sent with each machine, from which any one can readily acquire the art of using them. The machines are packed securely to go to any part of the world. To persons desiring more perfect information, we will, on application, by letter, at either our offices, forward a copy of I. M. Singer & Co's Circular, a paper widely devoted to the Sewing Machine interest.
